PRODUCT GUIDE

FOR THOSE WHO MAKE IT HAPPEN

Henkel

The world leaders
in Adhesive
Technologies.

Pritt

Established in 1969, Henkel invented the world's first glue stick, and since then the world of gluing has never been the same. Pritt now holds a leading position in the glue industry due to its strong values, innovation and technology, and plays an important role in the everyday lives of consumers. The unique formula of the Original Pritt stick, based on potato starch and sugar, delivers superior gluing performance while being sustainable and environmentally friendly.

Pattex

Since its launch in 1956, the Pattex brand has become synonymous with total reliability in gluing and bonding solutions for professionals, craftsmen and the construction industry. Pattex adhesives have been around for decades, offering users, from DIYers to Professionals easy and convenient applications for domestic bonding, assembling and repairing jobs with professional quality. This also reflects the commitment of the brand within the Henkel Group, worldwide leader in sustainability, to provide users with toxic-free formulations which will neither harm their health nor the environment.

Sista

Sista is an international brand for Sealants and PU foams and is recognized as a strong quality brand which provides a full range of professional solutions to ensure long-lasting results.

Tangit

Tangit has been built on 50 years of extensive research and experiences. Tangit provides installers safe and innovative solutions in piping through proven technical expertise and certified premium quality. Sold in over 60 countries, Tangit is the professionals' choice around the world.

Loctite

For over 50 years, Loctite has excelled as a global leader in reliable adhesive solutions. Available in over 80 countries worldwide, Loctite offers a state-of-the-art product portfolio and is distinguishable for its exceptional speed, strength, durability and ease of use.

Ponal

A ready to use wood glue for most kinds of woods, for assembling and repair jobs. The bonds produced are slightly flexible and have a clear glue line. Suitable for DIY, hobby, craft and school projects. Dries faster, clearer and stronger.

**Henkel, one of the world's leading
Adhesive Technologies manufacturers,
was founded in Düsseldorf in 1876.**

Water based

Water based

Solvent based

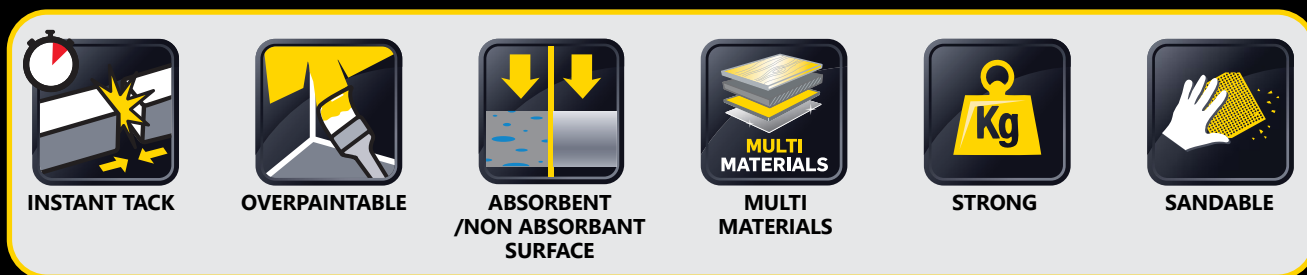

THE STRENGTH OF NAILS AND SCREWS WITHOUT THE MESS.

SCOPE OF USE

CHARACTERISTICS

- INSTANT TACK® dispersion formula
 - High initial tack
High adhesion properties especially wood to wood
 - Over paintable once dry
 - Gap filling up to 10 mm
 - Minimum application temperature +10°C
 - Low odour except Pattex NMN Water Resistant
 - Translucent after drying (only applicable to NMN Invisible)
 - Load it after 24 hours
- Solvent free formula except Pattex NMN Water Resistant

LIMITATIONS

One surface has to be porous for water-based formulation products. *Not recommended for permanent water immersion. Pattex NMN Water Resistant not suitable for PE, PP, PTFE, Acrylic glass.

CLEANING

- Immediately remove any adhesive residue with a damp cloth.
- Cured material can only be removed mechanically.
- Clean tools immediately after use with thinners or washing benzene.

STORAGE

- Store cool, dry and unopened, up to 18 months.
- Store away from heat, flame, and spark in a cool area.
- Keep away from children.
- Once opened, be sure to recap.

FAST, CLEAN AND DURABLE MOUNTING

MOUNTING TAPE CHARACTERISTICS

- Instant adhesion
- Easy, fast and durable mounting side
- Porous and non-porous surfaces
- Interior only: Blue roll 80kg
- Flexible
- Interior and Exterior only: Red roll 120 kg (waterproof)
- High temperature resistance (-40°C to +95°C for blue roll) (-40°C to +120°C for red roll)

WHERE CAN YOU USE NO MORE NAILS MOUNTING TAPE STRIPS?

Pattex No More Nails double-sided mounting strips can be used to mount hooks, house numbers, frames, pictures, signs, bathroom fixtures, kitchen fixtures... and remove them, anytime you want, without damage. Ideal for: metal, wood, ceramic, brick, stone, tiles, glass, plastic

(except PE, PP). Not recommended for use on Teflon, wallpaper or other unsound or dirt-repellent coated surfaces. Not suitable for mirrors. Not recommended for silicone

REMOVAL STRIPS

*Maximum holding power: up to 2 kg per strip under ideal conditions (mounting flat objects, thickness <10mm, on smooth glass or metal surfaces). Direct contact with water can reduce holding power.

PERMANENT STRIPS

*Maximum holding power: up to 3 kg per strip under ideal conditions (mounting flat objects, thickness <10mm, on smooth glass or metal surfaces). Direct contact with water can reduce holding power.

SUPER GLUES

- › Heat resistant
- › Water resistant
- › Shock resistant

A liquid formula super glue for precise dosage of single drops. Can be applied to tiny areas and parts. Solvent-free and easy-to-use for a strong bond – whether in an emergency or for daily use.

Extra tough, Waterproof, Flexible and shock resistant, Non-drip formula, Gap filling capability, and very easy to apply. Pattex Super Glue - Need we say any more!

LIQUID

SUPER GLUE LIQUID BENEFITS:

- Stand single tube with metering through
- Flows into the smallest cracks
- Dropwise dosing
- Solvent free
- Sets in seconds
- Can be used to bond: metal, china, rubber, leather, wood, glass, paper and plastics*. Not suitable for PE, PP, Styropor® and flexible PVC
- Not suitable for porous substrates
- For a successful bonding, ensure surfaces to be bonded are clean, dry and close fitting

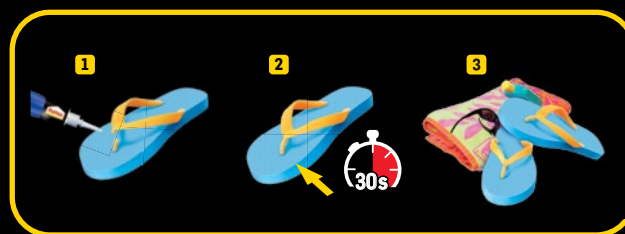

GEL

SUPER GLUE GEL BENEFITS:

- Extra strong and flexible
- Impact resistant
- Water resistant
- Does not drip
- Shock resistant
- Gap filling capability
- Glues even elastic materials
- Can be used to bond: china, rubber, glass, leather, wood, paper and plastics*. Not suitable for PE, PP, Styropor® and flexible PVC
- Ensure surfaces to be bonded are clean and dry

Pattex Heavy Duty Adhesive is a clear wallpaper adhesive, enables positioning. It is highly recommended for use on all wallpapers and posters, as well as for paper mache applications.

ABOUT

Wallpaper continues to be fashionable in trendy homes around the world. While it is important to choose the design of wallpaper that suits your room or home, you also need to calculate the quantity of wallpaper required for the project and ensure that you use a quality wallpaper adhesive to ensure your wallpaper stays stuck!

Pattex Wallpaper Adhesive ensures a perfect finish – every time! Pattex Wallpaper adhesive offers high-quality gluing and easy application for all your

wallpapering projects.

You can use Pattex Wallpaper adhesive on all types of wallpaper, from heavy, normal backed vinyl and other special wallpapers, to anglypta or wallpaper that can be painted over.

Pattex Wallpaper Adhesive is also non-toxic, dries transparent and enables easy positioning. What’s more, any spills can simply be cleaned with soapy water.

DIRECTION FOR USE

1. Sprinkle contents of sachet into 3 litres of cold water while stirring continuously. Allow to stand.
2. After 15 minutes stir thoroughly again.
3. Apply the Pattex Wallpaper Adhesive solution with brush or towel to the reverse side of the wallpaper

and hang (place and position) wallpaper. After hanging wipe off any excess paste immediately, using clean water and a sponge, while pressing the wallpaper against the wall. Curing time is 24 hours.

GOOD TO KNOW

When your mixing stick can stand upright in the mixture, it is ready for application. If it's too watery or too thick, positioning will be difficult and you may not achieve the desired results.

LOCTITE®

- ▶ **Flexible**
- ▶ **Multi Materials**
- ▶ **Transparent & Ultra-thick gel**
- ▶ **Extra Strong & Repositionable**

Loctite 60 Sec. Universal Glue is the first all-purpose glue that bonds in only 60 seconds. No more waiting and no more clamping! It quickly forms strong bonds between a wide range of common materials. It is the ideal adhesive for home use and its non-drip gel formula can be used on vertical or overhead surfaces.

SCOPE OF USE

FEATURES & BENEFITS:

- Fast, versatile, one part all-purpose glue
- Quick bond strength
- Non-drip gel formula can be applied on vertical or overhead surfaces
- Repositionable up to 40 seconds
- Water resistant
- Flexible
- Can be used for bonding wood, metal, leather, ceramics, stone, rubber and some plastics*.
- Do not use on dusty, dirty or wet surfaces
- Never use for bonding assemblies that will hold hot liquids
- Not suitable for bonding assemblies that will contain gaps

*Not suitable for polypropylene, polyethylene, polytetrafluoroethylene (PTFE)/Teflon®, silicone rubber.

Not suitable for bonding glass or foams.
